# INTERNAL 30

With Suction Poles

Compact and robust skyVac® Internal 30 high-level vacuuming system complete with built in trolley and fitted basket. Rapidly removing dust and debris from a range of internal environments, this unique system can reach up to 40ft all from the safety of the ground with just one operator.

Working at height can present obvious dangers, so it is vital for businesses to always abide by health and safety working practices. The versatile skyVac® Internal 30 high-level internal vacuuming system can reach up to 40ft from the safety of the ground and has been specifically designed to clean previously inaccessible out of reach internal areas, eliminating the need for scaffolding and hire costs.

With a motor wattage of 1000 watts and an air flow movement of 3800 litres per minute, the skyVac® Internal 30 high level vacuuming system is the perfect system for rapidly removing dust and debris from out of reach internal areas in environments such as shopping centres, large offices, universities, hospitals, libraries and schools.

For tasks that demand high filtration, HEPA filters can be used with this Vacuum.
