

## slipStream® Pro 20

**For next level patio and driveway cleaning; The Honda GX 390 Petrol Engine And 20" Surface Cleaner provides phenomenal power and precision.**

This 20" surface cleaner is powered by a reliable Honda GX 390 Petrol Engine with a 2:1 gearbox fitted between the engine and the pump to prevent the pump from over-revving; this enables a pressure of up to 3625 pounds per square inch, and maxing out at 250 bar.

This machine is designed to keep waste matter on the ground, and not on the operator or surrounding areas; it features a skirt which keeps the dislodged dirt and water under control. These aspects make the Pro 20 ideal for keeping dirt at bay so you can clean patios, driveways and more without having to worry about any mess being escaping onto the surface.

The powerful engine moves 15 litres of water a minute, more than enough to allow the surface cleaner to power through the square metres of paving. Other convenient features include low oil shut down, return to tank bypass, and adjustable pressure regulator. The suction/return hose has a weighted filter so that damaging particles do not enter your machine and hinder its performance over time, thereby prolonging and preserving your surface cleaner.
