TO 50M

skyVac® Real-Time Inspection System

Specially designed by Spinaclean for “real time” gutter clearance and high-level inspection, the NEW and IMPROVED Camera Inspection System has a sleek new look, with larger 4.3” high-quality screen and improved functionality for 2021.

Essential gutter cleaning equipment, the high-level inspection system not only helps you monitor your live progress but is also a great way to win new business. Simply attach the camera and monitor to the skypole, and in minutes you can show potential clients the condition of their gutters, all from the safety of the ground. Or why not use the camera system to earn extra income, offering high level property inspection on roofs, chimneys, or in lofts.

Quick and easy to use, the monitor and camera system are lightweight and engineered to cope with the rigours of gutter cleaning. The slimline monitor has a high quality 4.3” colour LCD screen display, with sun visor to ensure clear visibility. Able to cope with an array of lighting conditions, the overhead camera features LED lights for up close accuracy, whilst the monitor has adjustable brightness settings. IP4 rated, both camera and monitor are able to withstand a rain shower. Instantly paired, and not affected by Wi-Fi interference, the system is effective up to 50 meters.

No wires - No Apps - No Wi-Fi - No internet required!
